# Why Redesign the M36 Product

I've identified numerous opportunities for optimizing and enhancing the user experience for our customers. As a user myself, I've noticed several areas for improvement, and it seems many others share similar sentiments regarding their experiences with the product.

## M36-Investments and Lifestyle

## Background

"M36 is a digital investment platform that provides Nigerian investors with access to money market instruments, previously unavailable on a digital scale.

SERVICE OFFERING

## M36 Services Offering

- Treasury Bills
- Commercial paper
- Bonds
- Mutual funds

Before M36, **money market tools were traditionally offered through in-person banking experiences**, often involving paperwork and physical signatures. Bringing these tools into the digital realm raises questions about who the early adopters of such a product might be and which generation of digital users would find it attractive.

NOE eliminates the traditional barriers to investing and offers investors direct access to financial instruments that have been previously the exclusive domain of investment relationship managers. We've designed NOE to ensure simplicity in the onboarding and investing process while also empowering the customer to make sound investment choices based on their unique financial goals. We worked with key partners to deliver both the experience and products on NOE and are confident that we have launched a superior product in today's marketplace." - CEO

EARLY TRADITIONAL ADOPTERS

## Who were the money market Adopters?

*The traditional adopters of pre-digital money market tools were typically individuals and businesses with a relationship with traditional banking practices*

| Characteristics | Baby Boomers (Age: 57-75) | Generation X (Age: 41-56) |
|---|---|---|
| Preferred banking experience | Physical branches, phone calls, and paperwork | Mobile banking, online banking, and occasional branch visits |
| Technology adoption | 33% | 35% |
| Investment preferences | Conservative, low-risk, fixed income | Balanced approach, diversified portfolio, some risk-taking |
| Decision-making influences | Trusted advisors, family, and friends | Self-research, online reviews, and peer recommendations |
| Attitude toward change | Cautious, prefer established methods | Open to change, adapting to new technologies |
| Signature product | Certificates of deposit (CDs), savings accounts, and bonds | Mutual funds, exchange-traded funds (ETFs), and stocks |
| Communication style | Face-to-face, phone calls, and written correspondence | Email, text messages, and online chat |
| Financial goals | Preserve wealth, ensure a comfortable retirement, and leave a legacy | Grow wealth, save for retirement, and balance short-term and long-term goals |

**Baby Boomers:** Late adopters of Digital products, although digitally savvy, there's a high tendency of mistrust when it comes to financial digital products. Seasoned investors who were familiar with traditional financial institutions and had experience navigating the complexities of physical paperwork and in-person interactions might find the transition accustomed to traditional banking practices were also traditional adopters of pre-digital money market tools.

**Gen X:** This generation the SMS and Email era, enjoyed the early introduction of emails and SMS but not the internet at this time, they saw a shift in the adoption of many services to the digital age. Although they initially preferred face-to-face interactions for financial transactions, they valued the security offered by traditional banks but were not hesitant to embrace digital innovations due to their familiarity.

IDEAL TARGET AUDIENCE

## Who is M36 ideal for?

*Worldwide Google Trend Data for Bitcoin (13th January 2004)*

**#3: Average Age: 17.2 years**

With a median age of just 17.2, Nigeria's population is young, tech-savvy, and increasingly connected to the internet. With younger generations far more likely to learn and use cryptocurrencies, the future for grassroots crypto adoption looks bright.

**#2: 47% Have Used Crypto**

According to Statista, a whopping 47% of Nigerians (between 18 & 54) have used cryptocurrency before. This is the world's highest figure by a significant margin, lapping other countries like the United States (14%) or India (14%).

The young population is increasingly tech-savvy and is eager to adopt new technologies with unprecedented speed, especially given how quick to talk to peers. Also will only serve to further accelerate blockchain adoption in a country where more than a half of adults have already used cryptocurrency.

**Nigeria Crypto Adoption Key Trends and Analysis**

**#1: $56 billion in Cryptocurrency Transactions**

Nigeria saw the crypto transaction grow by 14% year-over-year to $56.3 billion between July 2020 and June 2021. This is despite the global decline in cryptocurrency popularity during 2022 being the bear market.

ORIGINATION

Digitally savvy and younger generations of Nigerian are adopting crypto, Foreign exchange and stock trading faster than other Investment options

## Competitve Analysis

PRIMARY RESEARCH

## Does the Product Appeal to Investors?

I conducted usability testing across various generations of investors, encompassing differing levels of experience with both digital and traditional investment methods. Baby boomers, millennials, and Gen Z individuals all possess some degree of digital familiarity, whether it pertains to banking, investing, or saving.

Andrew Chiquere
**Age:** 45
**Occupation:** Retired Lib
Banking Experience:
Digital apps: Bank App

**Comments:**

> "I want more information before I sign-up for this product is there someone I can call?"

**Observation**

User seemed skeptical about moving on with the user-flow purchasing commercial papers.

They seem to recognize the service offerings but wasn't sure to move on with the process

Cynthia
**Age:** 31
**Occupation:** Pilot
Banking Experience:
Digital apps: Bank App

**Comments:**

> "How much profit will I make when I purchase a commercial paper?"
>
> "What do I make after a month?"

**Observation**

Cynthia opted out because of a lack of information. Cynthia was much she wanted to know after investing and needed some more details. Don't achieve her goal at all.

Olusemi
**Age:** 32
**Occupation:** Medical facility owner
Banking Experience:
Digital apps: Bank App

**Comments:**

> "What NGN bonds? When does my investment mature? what's my gain?"

**Observation**

Olusemi seemed to miss the learn more button. Olusemi needs more information to improve her experience. Hence she was guessing her way through. She commented frustrated and unwilling to complete the purchase.

Raphael
**Age:** 34
**Occupation:** Business Owner
Banking Experience:
Digital apps: Bank App

**Comments:**

> "Why is my transaction unsuccessful?"

**Observation**

Raphael navigates the UI well enough, he navigates through the treasury bill process until an error pops up and isn't able to proceed further. He seems to have understand the error message(The wallet did not have any cash). When asked he said he intended to fund wallet at the treasury bills loop page but was not able to. he opted out of the goal.

Fred
**Age:** 47
**Occupation:** Software Engineering
Banking Experience:
Digital apps: Bank App

**Comments:**

> "What does yield term mean
>
> "Do I need to sign-up when I have my BVN

**Observation**

Fred navigates the UI well enough, but needs clarity on what the product offers and what terms are. Fred couldn't differentiate investment products from

**Pain points:**

- Sign-up the process too long, the user believes BVN exists that
- Didn't understand the UI
- Didn't understand the yield term
- Need the Digital concierge
- Alias

# Problem Statement

STATEMENT

"Investors, regardless of their generation, need a version of M36 that **makes it easy to understand the financial decisions they need to make, the risk involved and the benefits** helping them achieve their financial goals."

## How might we?

STATEMENT

How might we help potential investors regardless of their investment experience **facilitate they are making the best financial investment decision?**

1. They need to feel safe and understand the risks involved
2. They need to understand how much risk it takes
3. They need to feel like the app guides them to the right decision

CONCLUSION

A financial digital product like M36 is ideal for the older generations but it should appeal to the early digitally savvy investors who are not accustomed to traditional banking practices
